

INTRODUCTION

What is oil refining **Process**?

Sincere Oil:- An independent, Oil production and Everything related with a diverse, high-quality portfolio of operations, projects and exploration activities across nine countries on four continents

sinceroil core strategic focus is to generate sustainable cash flow improvements and returns over the long term by focusing on five key areas:

Focus on people, safety and sustainability: people are the foundation of our business. To remain sustainable in the long term, we must clearly exhibit our values in the conduct of our business. This encompasses being accountable for our actions and decisions, and respecting all stakeholders and the environment. ESG principles are integrated into every aspect of our business.

Ensure financial flexibility: we must ensure our balance sheet always remains able to meet our core funding needs.

Optimise overhead, costs and capital expenditure: all spending decisions must be thoroughly scrutinised to ensure they are optimally structured and necessary to fulfil our core business objective.

Improve portfolio quality: we have a portfolio of assets that must be actively managed to improve the overall mix of our production base as we strive for a competitive valuation as a business.

Maintain long-term optionality: while we are focused on ensuring the most efficient day-to-day operation of our business, we must keep a close eye on creating a competitive pipeline of long-term opportunities.

What is a Cryptocurrency?

A cryptocurrency is a digital or virtual currency that is secured by cryptography, which makes it nearly impossible to counterfeit or double-spend. Many cryptocurrencies are decentralized networks based on blockchain technology—a distributed ledger enforced by a disparate network of computers. A defining feature of cryptocurrencies is that they are generally not issued by any central authority, rendering them theoretically immune to government interference or manipulation.

Sincere Oil Mission

To create value for our shareholders, our employees and our business, and social partners by safely and responsibly exploring, mining and marketing our products. Our primary focus is gold, but we will pursue value creating opportunities in other minerals where we can leverage our existing assets, skills and experience to enhance the delivery of value.

Sincere Oil Values

Our six values guide all decisions made and actions taken in the conduct of our business. These values link our business activities to our environmental, social and governance (ESG) responsibilities.

Our Strategy and | Business Model

OUR STRATEGY

OUR FIVE KEY STRATEGIC FOCUS AREAS

sincereoil core strategic focus is to generate sustainable cash flow improvements and returns over the long term by focusing on five key areas:

- **Focus on people, safety and sustainability:** people are the foundation of our business. To remain sustainable in the long term, we must clearly exhibit our values in the conduct of our business. This encompasses being accountable for our actions and decisions, and respecting all stakeholders and the environment. ESG principles are integrated into every aspect of our business.
- **Ensure financial flexibility:** we must ensure our balance sheet always remains able to meet our core funding needs.
- **Optimise overhead, costs and capital expenditure:** all spending decisions must be thoroughly scrutinised to ensure they are optimally structured and necessary to fulfil our core business objective.
- **Improve portfolio quality:** we have a portfolio of assets that must be actively managed to improve the overall mix of our production base as we strive for a competitive valuation as a business.
- **Maintain long-term optionality:** while we are focused on ensuring the most efficient day-to-day operation of our business, we must keep a close eye on creating a competitive pipeline of long-term opportunities.

BUSINESS MODEL

Our ability to create value depends on the use of and access to various capital inputs – this includes access to financial capital and economically viable orebodies, as well as to the necessary mining infrastructure, including utilities, plant and equipment, and a skilled and experienced workforce. Creating value entails optimising and balancing the use of these inputs, enhancing positive outcomes and impacts, minimising those that are negative, and delivering on our strategy.

Natural capital

Our primary business activity is the exploration for, development and operation of oil orebodies to transform these into economic and social value. To do this, we need:

- Pipeline of economically viable Mineral Resource and Ore Reserve
- Access to various natural resources – land, water and energy, among others

Social Capital

Efficient conduct of our business relies on the development and maintenance of our mining operations and related infrastructure and equipment.
